Our Position

Serving winter since 1939, Nordica inspires everyone to find and grow their passion for skiing.

Our Vision

Be the leader in amplifying the sport and community of skiing.

Our Mission

Inspire and outfit every skier with the equipment they'll rely on to experience amazing days.

Our Promise

Invite the world to ski.

Our Values

Be the best.

We never settle for less than delivering excellent products for all skiers.

Do the right thing.

We always treat people and the planet with integrity.

Share the joy.

We love what we do. We live to share the fun and happiness skiing brings into our lives.

Keep creating legacy.

Our experience and expertise fuel leading innovation and help shape the future of skiing.

Build relationships.

We empower community through shared passion. We build deeper bonds between people and their skis.

Manifesto

This one goes out to all the people who love to ski. To every skier who makes each run one to remember.

And to everyone who opens their powder-packed hearts to the world.

This goes out to the boots and skis that make our days brighter and our runs better. To the adventures that bring us closer and remind us what matters.

**Together, we create family and fellowship.
We always raise the bar.
We play it our way.**

And we invite the world to come along with us.

Let's Ski.

Dialed in Precision.

Speedmachine BOA®

Nordica's Speedmachine BOA® is at home anywhere—and everywhere.

With an emphasis on comfort and performance, these all-mountain boots feature liners and shells that reduce weight and boost the transmission of power. Thanks to a **BOA®** closure system paired with Nordica's Tri Force technology, you can adjust the boot's fit with exceptional precision. This design also enhances response for incredible confidence and control. And for a fit that's truly personal, the boot's liners and shells can readily be customized. Whether making turns on corduroy or floating through powder, Nordica's **Speedmachine BOA®** is ready to make your dreams come true.

**DIALED IN.
PRECISION FIT.**

Sportmachine

Pure Comfort

Sportmachine ACP System

The Sportmachine is equipped with a adjustable cuff profile (ACP) to allow - with only one movement - a neutral standing position for every leg size, making skiing all day easier and more comfortable. Our R&D department has been able to redefine this feature, making it even better than the past. With the new ACP, Sportmachine can reach a larger variety of skiers, by having a total opening of the mechanism that can reach 14 mm more in total volume. Moreover, the new ACP is screwed on the cuff, ensuring more performance in skiing.

MORE VOLUME TO FIT MORE SKIERS, UNPARALLELED COMFORT AND INCREASED PERFORMANCE.

Same Technology, Two Different ACP

A constant analysis on legs and anatomy led us to achieving important goals in differentiating not only products, but even technologies between men and women skiers. With ACP, we designed a dedicated shape which better accommodates women's lower legs. In women product, our team has also developed a different system, which is fixed with only one screw to the cuff (men version have two screws) that allows a more natural flex and stiffness based on women's average power and needs.

Men

Women

Rear Spine Construction

It reached this ambitious goal by redesigning the whole cuff, adding the back tooth as conjunction between shell and cuff as we already did in our successful Promachine and Speedmachine line. This technical feature improves performance and carving feeling to the next level on Sportmachine.

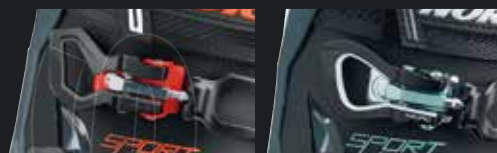

- More performance, Same beloved comfort.

Buckle Design

As we did with the ACP, we also researched the buckles leading us to engineer dedicated designs for men and women. An investment that is not only a fancy cosmetic touch, but gives us the opportunity to improve grip on buckles to open and close them easier than ever.

- Easier open & closing buckle system

Men

Women

Primaloft Liner

Liners are the secret soul of every ski boot: that's why we are always looking for innovations and investments in this segment. In the Sportmachine, we upgraded the liner by using some of the most innovative features present in our ski boots line. The 3D black cork gives a perfect anatomical comfort shape that can be easily customized using our Nordica oven to generate the perfect fit. The Isotherm layer, together with our well known Primaloft technology, ensures feet stay warm and dry all day long.

- Perfect Customization
- Warm & dry

HF Pro

Entry Reimagined

Uncover the pinnacle of comfort and convenience with **Nordica's HF Pro Collection**. Effortlessly slip them on and off with a user-friendly closure system that perfectly conforms to your foot's unique shape. With a refined and modern design, these boots excel in providing the control and confidence you seek. **Nordica's HF Pro Collection** give you the power to ski with unwavering control and unmatched confidence while ensuring unparalleled comfort, so you can relish each and every run with a lasting smile.

Closure System

Incredibly easy to operate, the HF Pro Closure System maximizes convenience while boosting stability and control.

- Exceptionally easy to step in and out of and adjust.
- Control and response paired with convenience.

XL Wiring Cable Buckle

The HF Pro's Micro Fit Dial allows you to fine tune the boot's fit—and return to this tailored fit each time you step into the boots.

- Creates a precise, personalized fit.
- Set-it-and-forget-it convenience.

Adjustable Cable

The HF Pro closure system can easily be adjusted to fit a variety of foot and lower leg shapes.

- Creates a personalized fit that mimics your foot and lower leg shape.
- Maximizes performance and comfort.

ACP

The HF Pro's Adjustable Cuff Profile allows skiers with high volume calves to increase the circumference of the boot's upper cuff by up to 8mm.

- Find the ultimate fit with ease.
- Boosts performance and comfort.

All-Mountain Adventure.

Unlimited

Tri-Force Cuff

By strategically positioning three different densities of materials—a feat done by no one else in the game—Nordica's Tri Force Cuff Construction boosts the fit and performance of a boot while minimizing weight. A softer front cuff panel wraps the shin to enhance fit and ensures a smooth flex when skiing and optimizes mobility when hiking. The cuff's mid layer provides lateral support and helps boost energy transmission. Lastly, an exceptionally stiff spine supports the ski-walk mechanism to maximize power, control, and response.

Hike Mechanism

This all-new mechanism maximizes stability, control, and confidence when skiing thanks to the mechanism's lock-out feature. It also offers exceptional comfort and mobility when walking or skinning. Thanks to an incredible range of motion of 65 degrees, the boot provides the freedom of movement necessary for climbing the most demanding slopes.

Closure System

Instead of classical bales, our Unlimited boots feature a streamlined wire closure system that cradles your foot to offer a precise fit that boosts comfort and control. When it's time to hike, skin, or just loosen up your boots, you can simply undo the quick-release power strap and flip up the toe buckle to release the closure system, which loosens the lower shell for greater comfort and mobility.

Sole

This sole is compatible with both ISO Gripwalk and alpine touring standards. And thanks to its screw-on design, the sole can readily be replaced to maximize the longevity of the boot. No matter how you define adventure—or where you pursue it—you can depend on Nordica's Unlimited soles.

Liner

Both feature a 3-D shape that matches the contours of your foot and are thermomoldable for a truly custom fit. They also showcase PrimaLoft insulation for additional warmth. For those looking for optimal performance on the approach, our 3-D Light Performance Fit TF PrimaLoft liner weighs only 280 grams. It's truly at ease climbing the longest and most demanding slopes. And for skiers looking for maximum downhill performance, our 3D Corkfit PrimaLoft Light liner provides unparalleled control and response in an all-mountain touring boot. Both Unlimited liners are also PVC-free for a reduced impact on the environment.

Ski Everything, Better.

The redesigned Enforcer and Santa Ana are here.

Smoother. More responsive. More fun for everyone.

Welcome to another all-mountain revolution,
from your friends at Nordica.

10
YEARS

Enforcer / Santa Ana

10 Years of Success.

A Decade of Legacy.

Year after year, the Enforcer continues to be awarded as the “go to ski” for all-mountain fun. Named “Best in Test” by SKI Magazine, and Editor’s Choice by many others, Enforcers are designed for those who embrace the entire mountain. It’s no wonder the Enforcer collection has won plenty of accolades and no shortage of admirers.

AND COUNTING...

Enforcer

Since making its debut, the Enforcer family has emerged as one of the most award-winning ski collections of all-time.

We wanted to make these iconic all-mountain skis even better. This inspired us to reimagine the Enforcer collection, infusing these skis with a new shape and construction.

Thanks to an enhanced design—which embeds both **a wood core and an elastomer Pulse core between two layers of titanal**—these legendary skis are smoother, more playful, and versatile than ever. Armed with fresh confidence, they’re ready to ski anything—and everything—from first chair to last.

Santa Ana

No wonder the Santa Ana family is one of the most award-winning ski collections of all-time. Yet guided by a commitment to relentless refinement, we wanted to make these iconic all-mountain skis even better. Building on the revered performance of the Santa Ana family, **their evolved shape is truly at ease in any terrain—and from first chair to last.** Thanks to an enhanced design—which pairs both a wood core and an elastomer Pulse core with a sheet of terrain-specific metal—these legendary skis are smoother, more playful, and versatile than ever. Make each day one to remember with Nordica’s Santa Ana skis.

Double Core.

Double the Core. Double the Fun.

Perfect Combination

We've since expanded the use of our **Double Core technology**, reimagining iconic models by enhancing their performance even further. And while the design and construction of each model is tailored to its specific needs, these skis are united by a common vision—a commitment to amplifying fun.

Race

Dobermann 5

A New Era.

BRED FOR SUCCESS.

Nordica's Dobermann is no stranger to standing atop the World Cup podium. For decades, it's been the benchmark by which all other racing boots are measured. And now, it just got even better. Armed with an even more anatomically correct fit, the Dobermann 5 offers unrivaled precision and response. Its shell maximizes power and control while the boot's Bi-Injected Racing Spine delivers unparalleled support. Especially thin, its Heel Link liner cradles the contours of your foot and securely anchors your heel, creating the perfect marriage between your foot, the liner, and shell. Thanks to the shell and liner's streamlined design, the Doberman 5's sole features a reduced length that further amplifies your performance. And to ensure the boot looks as good as it performs, it sports a blacked-out appearance—complemented by the iconic glow of Dobermann eyes. Go fast, take chances, and enjoy the sweet taste of victory with Nordica's Dobermann 5.

Tweener:

Inspired by our in-line skis and boots, these full-featured products deliver the confidence and performance young skiers need to reach the next level.

Junior:

Especially easy to turn and control, Nordica's Junior skis provide the confidence and performance kids need to progress.

Rental Ski & Boot Technologies

Our dedicated rental boots are easier to size, easier to fit, easier to adjust, manage and maintain, which makes it easier for skiers to learn and have fun skiing.

1. PU Construction

To ensure better on-snow performance and longer lasting durability, every Nordica rental boot is constructed exclusively with PU plastics.

2. Macro/Micro Buckle Adjustments

Faster, easier buckle adjustments meet the needs of today's rental customers.

Multi-Macro Catch Range: +/- 30mm
Multi-Macro Buckle Range: +/- 20mm
Micro Buckle Range: +/- 10mm

3. Sanitized® Hygienical Liner

Keep your rental fleet as safe, clean and functional as possible. Every Nordica rental boot has a Sanitized Hygienical Liner that fights against odour and bacteria while maintaining the highest level of comfort.

Benefits

- Increase of wearing comfort
- Optimal Hygiene function
- Built in Deodorant
- Bacteriostatic & Fungostatic protection
- Protects durably from microbial attack
- Protection of material vs microbial damage

4. Bar Code & Sizing System

Test & Buy Ready
Removable stickers

5. Rental Ready Kit

Incorporate any Nordica boot into your rental fleet with our easy to add bar code kits.

Velcro Power Strap Kit Includes:

- 20 pieces of Velcro strap band (10 right + 10 left) for 10 pairs of boots;
- 10 pairs of matched bar codes;
- 3 sheets of stickers that indicate the size and sole length of every Nordica JR and SR boot.

08A02800000

6. 4 Multi Pack Codes Dedicated For Rental

- 100% same boots (Color, graphics, specs ect.) as in line rental codes.
- Delivery in master carton multipack. 4 BOOTS PER SIZE.
- No single skiboot box, no allen keys, no instruction booklet.
- Order minimum 4 of an individual size.

*Only available on the Sportmachine 90 + 75 R's

1. Optimized Tip/Tail Proportion

More harmonic feel throughout the entire turn.

2. Stronger Edge

Harder, thicker edge material increases the durability and prolongs the life of the ski.

3. Extra Durable Knoppe Topsheet

Extra thick, longer lasting PU topsheet resists scratching and maximizes durability.

4. Tip & Tail Protectors

Integrated steel tip and tail protectors prevent topsheets from chipping and further extend the life of the ski.

5. Tool-Free Binding

Easy-to-use Marker FDT binding system offers quick, intuitive adjustments. Sliding toe and heel adjustment properly seats the boot on the ski, so skiers are more balanced and better positioned to turn their skis more easily.

6. Forward Pressure Confirmation

Easy-to-read forward pressure indicator instantly confirms forward pressure adjustment.

7. GripWalk® Bindings

Accept GripWalk soles with no extra adjustments required.

8. Full Cap Construction

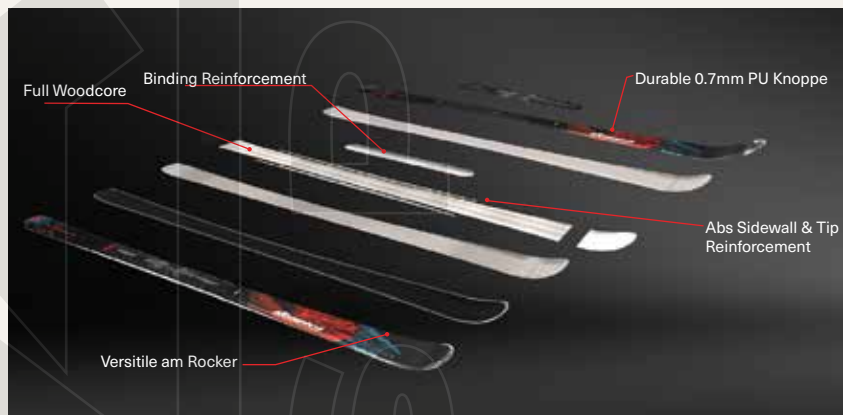

Protects the topsheet from chipping and extends the life of the ski.

9. Partial Sidewall Construction

Capped tips and tails protect skis against chipping while full sidewall construction underfoot increases power, stability and

10. Bar Coded Inventory System

An easy-to-read bar code integrated into the FDT plate simplifies inventory control and management.
